FULL-STACK DEVELOPER & INTERFACE DESIGNER

PROFILE

Full-stack developer and interface designer building websites and web applications for businesses. I take a product from first sketch through to production — interfaces, front-end code, back-end integration and launch — with the performance and accessibility to match.

EXPERIENCE

Freelance Developer & Designer — Independent

2022 — Present · Lagos, Nigeria (Remote)

- Designed and shipped marketing sites, dashboards and product interfaces for small teams.
- Built front-ends in HTML, CSS, JavaScript, React and Next.js; back-ends in Node.js and Python.
- Handled scope, timelines and hand-off directly with founders and marketing leads.

SELECTED WORK

- Restaurant website with an owner-editable menu
- Yoga app: daily flows, schedules, progress
- Fast food ordering and delivery tracking app
- Finance dashboard for revenue reporting
- Interior studio portfolio site
- Design systems and component libraries

SKILLS

Front-end

HTML & CSS, JavaScript, React, Next.js

Design

Figma, design systems, responsive layouts, wireframes

Back-end & tooling

Node.js, Python, Git & GitHub, REST APIs

Quality

Performance, SEO, accessibility (WCAG AA)
